Algerithm

Precise step-by-step instructions that can be followed to achieve a task

pregram

Instructions written in a special language or 'code' that a computer can understand

Numbers that represent text, images, sound and video

Data going in to a computer

OUTPUT

A <u>response</u> made by a computer

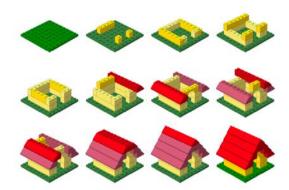

Instructions that are followed in order

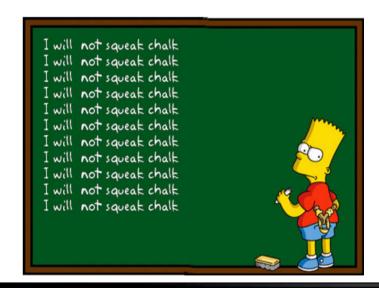

Making a choice in a computer program

repetition

Compute www.icompute-uk.com

Instructions that are followed more than once, a number or times or until something happens

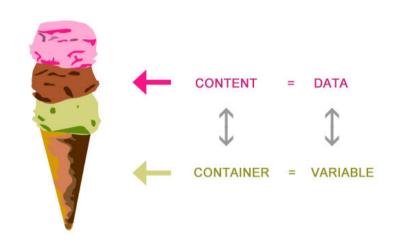

A way computer programs store and change data - like a score!

flavour = chocolate

or
flavour = strawberry

or
flavour = mint

Deble

Working through a problem systematically to find out what's going wrong and fix it!
