`</a>`

# CSS Cheat Sheet

## Writing CSS Code

```
Selector {  
    property: value;  
}
```

## Colour

```
color: text colour name;
```

## Background

```
background-color: colour name;  
background-image: url(location of the image to display as a background);
```

## Text

```
font-family:"name of the font family";  
font-size: 48pt;  
font-style: italic;  
font-weight: bold;  
text-align: center;  
text-align: right;
```

- sets the font
- sets the font size to 48
- sets the font to italics
- sets the font to bold
- sets the font to centre
- sets the font to right

## Example

```
<style>  
body {  
    background-color: PowderBlue;  
    background-image: url(http://www.icompute-uk.com/Images/pumpkin.png);  
    font-family:"comic sans ms";  
    font-style: italic;  
    font-weight: bold;  
    text-align: center;  
    color: hotpink;  
}  
</style>
```

Remember to use American spellings

e.g. center and color
